GAME STORYLINE

"Kent Brockman here at the Action News desk. Well folks, Springfield has a "Fever," but it's not the good kind of fever you are happy to stay home from school with, nor the kind that can sometimes produce amusing hallucinations, heh heh, no, not even the kind that gives you a good sweat and helps you shed a few pounds. This is "Wrestling Fever" and it was brought on by an alien force. Yes, believe it or not, we have been challenged by wrestling rivals from another planet...now just wait a minute, this is really un-believable, is this another story from I.P. Freely? No? Okay...well, unless we produce a challenger on par with our town's founder — renowned for wrestling a bear — we are in deep trouble. According to Springfield's scientific community it is entirely possible that this all came about when our alien challengers spied on Springfield back in the days of Jebediah Springfield and must have witnessed his famous bout with the bear. Traveling from light years away has not allowed them to reach us until now — aren't WE the lucky ones. Well, this reporter will be bringing you all the action LIVE from the various impromptu wrestling rings set up around town. Be sure to tune in."

In-Game Screen Display

- **Win Indicator** – When highlighted, indicates how many rounds won in the match.
- **Attacks Mode** – The attacks available to each character are highlighted. Simply press the corresponding button to execute the attack.
- **Health Meter** – The Health Meter displays the health level of each character. Your health will decrease every time your opponent successfully executes an attack on you. The amount of damage that you receive depends on the maneuver the opponent used. Health slowly replenishes during gameplay.

- **TAUNT Meter** – This records the number of letters the player has acquired to form the word TAUNT. When the full word TAUNT is highlighted, press the **R1** button to deliver the taunt and reap the benefits.
- **Recovery/Stunned Meter** – This blue meter will display if you are being pinned, grappled, or are held in some other way. It also appears when your character becomes “dizzy” or “stunned” as a result of a Taunt or other attack. This also indicates how much time is required before your character will regain consciousness or be able to kick out of being pinned or another hold. Rapidly pressing the **X** button speeds up recovery.
- **Energy Meter** – The Energy Meter displays the available energy for each character with which to perform moves. Your energy decreases when you execute a maneuver. The different maneuvers that you execute cost different amounts of energy. When the corresponding button is lit, this means that you can execute this maneuver by pressing the corresponding button on the Controller. Energy will slowly increase if you do not perform any maneuvers.

Moves and Special Features

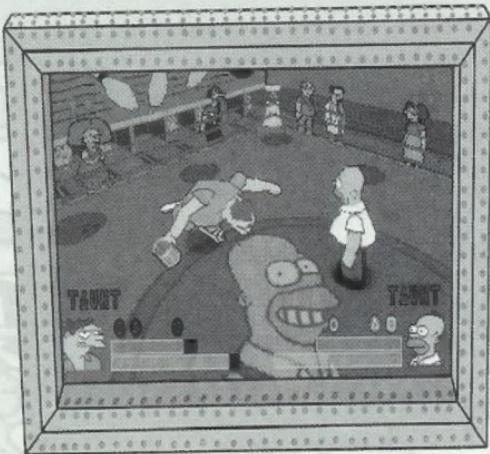

For a town that was founded by a wrestler of bears, it's no surprise that a lot of its citizens know some moves. Some that may look familiar to you include:

Basic Attacks/Combo: Pressing the **□**, **△** or **O** button will respectively attack your opponent with a low, medium or high energy attack. If you connect the first blow with the **□** button, press it again quickly and connect again for a combo—you can link up to four hits in the combo if each connects successfully. The **△** button attack is most often a projectile or projectile-like attack. The **O** button attack is a high powered move which is often quite unique for each particular character.

Grappling: You can grapple by facing your opponent and pressing the **■** button. Your character will lock arms around the opponent. Then, while you are attached to the opponent, press the **□**, **△** or **O** button to perform a maneuver. The maneuvers will vary depending on which character you are using.

Rope Maneuvers: You can use the ropes to execute different maneuvers as well. Using the directional pad, move your character quickly toward the ropes and as soon as he or she bounces off the ropes, press the **□**, **△** or **O** button to perform the maneuver. Again, the maneuvers will vary depending on the character.

Taunt: Taunt your opponents with insults and threats to gain a temporary state of invulnerability. Any of the characters can TAUNT an opponent, but you have to earn the taunt letters to spell out the full word TAUNT before the user can execute this special action. The Taunt Meter tells you which letters you need (see the In-Game Screen Display section).

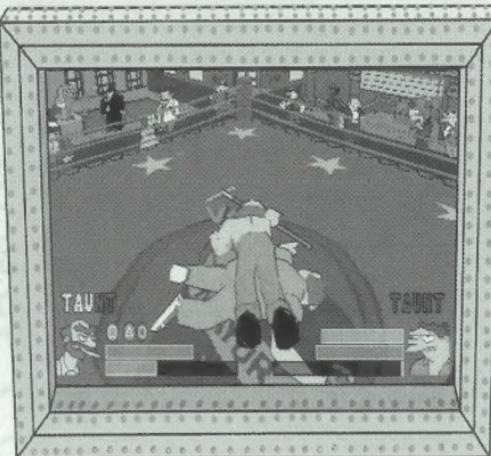

Earning a Taunt is a simple process; it can be done in two ways:

1. Collect the Exclamation Mark power-ups that appear randomly in the ring during a bout. (See POWER-UPS section below).
2. If you successfully connect with a four-hit □ button combo against an opponent, then your character earns a letter.

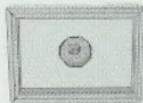

After executing a TAUNT, the Taunt Meter resets to empty and you must earn the letters for the TAUNT again. If you execute a TAUNT when your opponent is standing still, they will be rendered temporarily DIZZY.

There is no limit to the number of taunts you can acquire in a match and taunt letters carry over from round to round, but reset after each opponent.

Pinning: To win a round, you must successfully pin and hold the opponent down for a 3 count, you have won the round. You can only pin an opponent when he or she is lying prone on the ground. To perform a pin, move in close to the prone opponent and press the □ button. Your character will drop down in the "cover position" and proceed to count off. If the opponent 'kicks' you off (using the X button), then he or she has recovered and the bout resumes. If your character is able to count through to "3" during this pin, then you have won the round.

POWER-UPS

Donut

Scarf these down for a minor energy boost.

Atom

Grabbing one of these will replenish your entire energy bar.

Popcorn

Popping these down offers a quick, small dose of health.

Krusty-O's

A serving of this "nutrious" cereal guarantees a big dose of healing goodness.

Assassins Sneakers

Built for speed, these will have you zipping around the ring as soon as you grab them.

Exclamation Mark

This will give you one letter for a TAUNT.

Question Mark

A random, mystery selection from the above power-ups.

Pause/Soft Reset

You may Pause game play during a round by pressing the **START** button. This will bring up the Pause Menu. From here you may quit the game (see below) and go back to the Title Screen or you may also adjust the various audio settings as described in the OPTIONS section above.

The *Simpsons Wrestling* also allows you to 'soft reset.' During gameplay, press the **START** button (to pause the game) and an options screen with "Continue," "Quit" and other options appears. If you then press and hold the **SELECT** button and then (while holding down the **SELECT** button) press and hold the **START** button, the game will reset to the Title Screen.

Starting A New Tournament

To begin a new campaign, enter the Main Menu by pressing the **START** button from the Title Screen. Then highlight **NEW CHALLENGER CIRCUIT** and press the **X** button.

Now you may choose a character to use throughout the circuit. The available characters' pictures are shown on the bar at the bottom of the screen.

The Question Mark picture boxes are characters that cannot be chosen at the present time and will be unlocked as you progress through the tournament.

To go back to the Main Menu press the **△** button.

Once you have selected your character press the **X** button to start the first match.

It's time to get rumblin' Simpsons style!
